

Tell us your worries.
Anonymously.

ABOUT THE APP

MEET CONFIDLY

confidly is a mobile app which you can use to **anonymously share your worries**. You receive opinions from other people who are there to share their advice and experience.

confidly is a community of people who care. **By caring, they change the world.**

THE NAME

confidly /con-feed-lee/

We wanted the name to represent the nature of the app. We put together two words that best describe the app: **confide** anonymously.

WHY DID WE MAKE THIS APP?

According to some research, 44% of people are depressed. 19% have only one close friend, while an alarming **25% of people have no friends** to confide in :(

Not everyone is lucky enough to have someone to turn to in times of trouble! And even if you are among the lucky ones, we've all experienced having worries that we were either ashamed or afraid to share with our friends and family.

We want people to be safe in sharing their worries and secrets, so we created an anonymous environment.

WHO ARE THE USERS?

- **people who have worries** and want to share them anonymously
- **people who like to help** or share their opinion
- **people who like to browse and learn** from other people's experience

WHY IS CONFIDLY SO SPECIAL?

Anonymity – your worries are posted anonymously, so you never have to worry that someone would recognize you by your name or other content you posted.

Personal stories – unlike other Q&A sites, confidly specializes in personal issues and topics, from relationship issues, marital or emotional problems, sexual issues and mental health.

Community – people who gather around confidly are caring and altruistic. They are inclined to help others in need, and give them their best advice.

Anti spam – we are very strict about blocking users who break our community guidelines (spamming, advertising). Compared to web solutions, we don't just block spammers, but disable their device ID access, which means that we make sure they are no longer able to hurt our community.
